

Introduction to and Update on CDC's Travel Restrictions Procedures

Kara Tardivel, MD, MPH; Robynne Jungerman, RN, MPH; Laura Leidel, MPH, FNP-C
 Division of Global Migration and Quarantine, Centers for Disease Control and Prevention

BACKGROUND:

METHODS:

- Descriptive analysis June 2007–Dec 2017 using CDC database
- Restricted travel cases that met DNB/PHLO criteria:

1. known or believed infectious with or at risk for serious contagious disease posing public health threat during travel

AND

2. not aware of diagnosis, or aware and not following public health recommendations, or unable to be located

or

3. likely to travel via commercial air into, through, or from the United States or travel internationally by any means

or

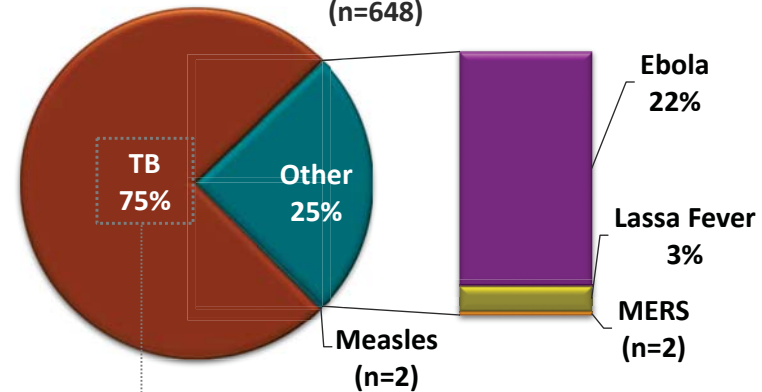

4. placement needed to respond to a public health outbreak or to help enforce a public health order

¹CDC. Criteria for requesting federal travel restrictions for public health purposes, including for viral hemorrhagic fevers, 2015. 80 FR 1640:16400–2

RESULTS:

Do Not Board (DNB) & Public Health Lookout (PHLO) Actions June 2007–December 2017

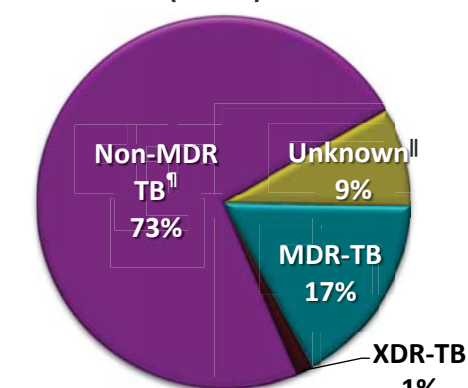

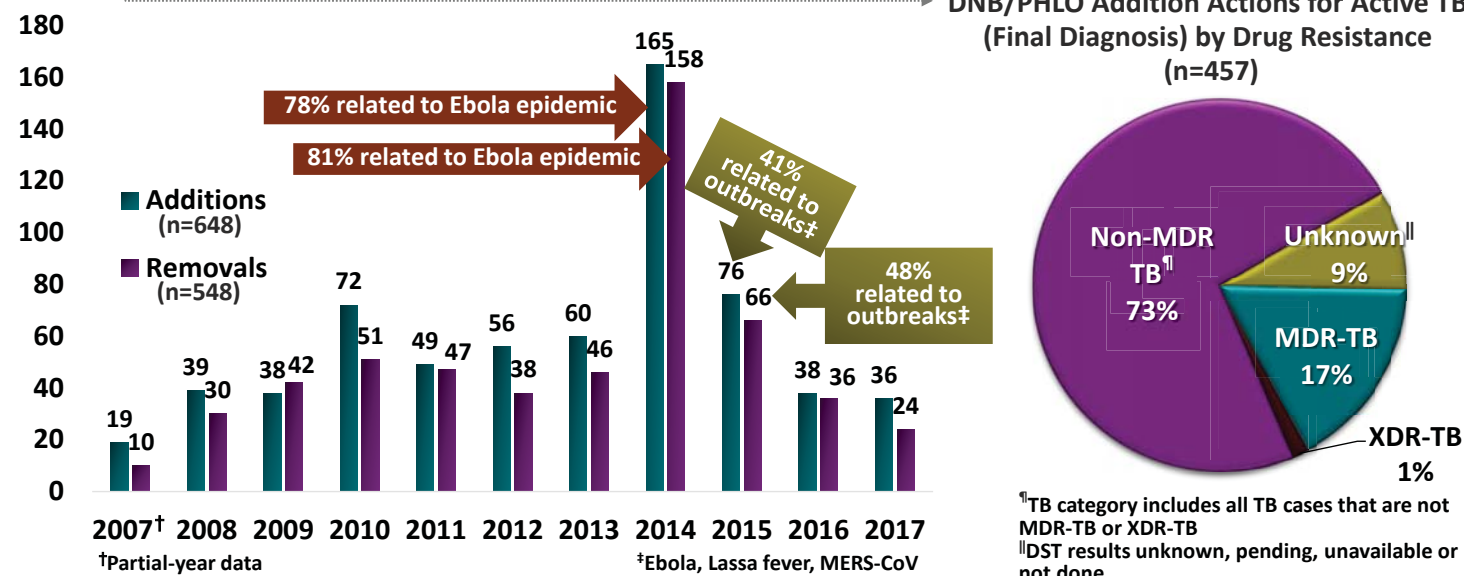

DNB/PHLO Addition Actions by Disease of Interest (n=648)

DNB/PHLO Addition Actions: Traveler Characteristics (n=648)		
Age	Mean 44 yrs	Range 2–89 yrs
Gender	Male	368 (57%)
	Female	251 (39%)
	Unknown	29 (4%)
Individuals	628 [§]	

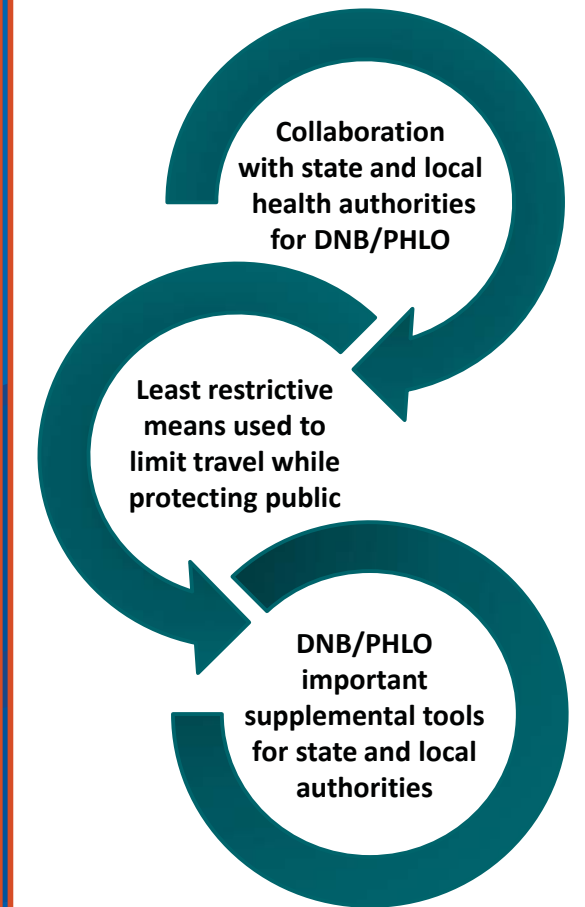

[§]19 of these individuals were added more than once

DNB/PHLO Addition Actions for Active TB (Final Diagnosis) by Drug Resistance (n=457)

[†]TB category includes all TB cases that are not MDR-TB or XDR-TB
[‡]DST results unknown, pending, unavailable or not done
